Phase 10 | Eight genuine takes | Corrected recording script

Canonical words. Exact splitter numbering. No detector or threshold changes.

Supersedes the old scripts. Numbers are one-based sentence_units(text, False), including semicolon/colon splits. Read all printed units; do not speak numbers/bars. Mode A: all takes. Mode B: 02/03 vs own 01. No C take.

Quiet room; same mic about 30 cm from your mouth; no music/fan. Make and listen to your own 10-second test for clipping/hum. Record each take once; keep going through slips and note them. No detector tuning on any take.

Gettysburg - canonical sentences 1-10, full text

Reading source: data/transcripts/canonical/gettysburg.txt, never gettysburg__lv_fb__orig.txt.

1. Four score and seven years ago our fathers brought forth on this continent, a new nation, conceived in Liberty, and dedicated to the proposition that all men are created equal.
2. Now we are engaged in a great civil war, testing whether that nation, or any nation so conceived and so dedicated, can long endure.
3. We are met on a great battle-field of that war.
4. We have come to dedicate a portion of that field, as a final resting place for those who here gave their lives that that nation might live.
5. It is altogether fitting and proper that we should do this.
6. But, in a larger sense, we can not dedicate -- we can not consecrate -- we can not hallow -- this ground.
7. The brave men, living and dead, who struggled here, have consecrated it, far above our poor power to add or detract.
8. The world will little note, nor long remember what we say here, but it can never forget what they did here.
9. It is for us the living, rather, to be dedicated here to the unfinished work which they who fought here have thus far so nobly advanced.
10. It is rather for us to be here dedicated to the great task remaining before us -- that from these honored dead we take increased devotion to that cause for which they gave the last full measure of devotion -- that we here highly resolve that these dead shall not have died in vain -- that this nation, under God, shall have a new birth of freedom -- and that government of the people, by the people, for the people, shall not perish from the earth.

Files, transcripts and truthful notes

Save readable WAVs in data/human/raw/; use each listed transcript basename with .wav. Only these eight WAV names are discovered; do not rename MP3/M4A to WAV. Raw rate/channels/bit depth: no fixed requirement (stereo/16 kHz tested). Conversion: mono PCM16/44.1 kHz, MFA 16 kHz, no gain normalisation. Upload: positive duration, <=600 s and <=25 MiB. Required edge silence: NOT SPECIFIED; trim padding up to 0.25 s.

YOU write these eight as-spoken files after recording, using the canonical words plus your actual slips/omissions/repetitions. Keep punctuation; remove numbering/bars/headers. No lv_fb deviations are inherited. The driver expands numbers; the pipeline writes data/transcripts/as_spoken/{text_id}__user__input_<hash>.txt from your supplied text for MFA.

Notes: data/human/raw/notes.md: fenced json block, takes dictionary, every supplied WAV basename without extension, flaws list and slips. Declare empty flaws explicitly. FORMAT EXAMPLE ONLY:

```json
{"takes":{"gettysburg__user__take01":{"flaws":[],"slips":"none"},"gettysburg__user__take02":{"flaws":[{"type":"rushing","sentence":4}],"slips":"describe actual slips"}}}
```

Each flaw uses a supported type plus positive integer sentence, or finite raw-time start/end with 0 <= start < end <= raw duration. Use actual pause times for precise labels; sentence notes are approximate intentions. Phase10 notes: NO severity. Separate human.annotation_labels imports: type:severity, 1-5 required. Types: rushing, dragging, monotone, too_quiet, mumbling, awkward_pause, missing_pause.

Consent: YOU write nonempty data/human/CONSENT.md only if you agree: "I, <your name>, agree that my recordings may be published under CC BY 4.0." Wording is not validated; no consent is created for you.

Pause check: both gaps are inside one unit, with no punctuation between adjacent words. Human matching has no punctuation gate: same type, primary IoU >=0.3; historical pause-centre <=0.25 s reported separately. Detector comparison needs adjacent mapped words, not guaranteed flags. Synthetic injection rejects larger | sense, due to the following comma; it is NOT the human matcher.
